

Dr Arthur Brandwood
Principal
Brandwood Biomedical Pty Ltd

Arthur Brandwood, Ph.D., MIMMM, CEng, has over 20 years experience in the medical technology field in industry, academia and government including responsibilities as Director of Devices Registration and Assessment and of the Biomaterials and Engineering laboratories at the Australian Therapeutic Goods Administration (TGA). Arthur is heavily involved with the Australian medical devices industry association and also represents Ausbiotech in consultations with government, particularly in the medical devices area. Arthur is both a

biologist and a materials engineer and has particular scientific expertise in biomaterials and implants, especially interactions between implantable materials and living tissues.

Arthur has held academic positions in Australia and the UK and has lectured widely on regulatory affairs and medical device testing and development including delivery of training courses to industry and government in Australia and SE Asia. He is the accredited Australian expert to several international medical device standards committees in the area of implants and biocompatibility and has served as chair of the ISO Working Groups on Tissue Engineered Medical Products and on Implant Tracking.
