

Dr Brian Bloomquist
Manager
Global External Research and Development Eli Lilly and Company
Indianapolis, Indiana

Dr. Bloomquist plays a key role in the Global External Research and Development group of Eli Lilly and Company where he evaluates the technical merit and portfolio fit of external opportunities in endocrine and cardiovascular disease. Prior to his move to Eli Lilly, Dr. Bloomquist spent 11 years in the Metabolic Disorders group at Bayer HealthCare in which his lab was engaged in obesity drug discovery and he held leadership positions in the management of the Obesity research portfolio.

Dr. Bloomquist completed his post-doctoral studies at The Johns Hopkins University School of Medicine following his graduate work at Purdue University where his thesis was awarded the first A.H. Ismail Interdisciplinary Dissertation Award. Dr. Bloomquist is an inventor on a number of patents, and is the author of multiple peer-reviewed publications, including an article highlighted on the cover of the journal *Cell*.
